- Aluminium Chequer Plate

Bitterne Park School Case Study

The Project Solution

To enhance and protect the new school's interiors from damage, Gradus supplied and fitted SureProtect Pure® Wall Cladding to the commercial kitchen areas and the Food and Nutrition classrooms.

'The new school required a robust wall protection solution that could withstand hundreds of people passing through daily as, once complete and at capacity, this will be the largest high school in the South. As Gradus has a wealth of experience in the industry we knew they'd be able to supply us with a product that met our needs. The corner guards and wall protection systems installed are of superior strength to protect and future-proof the building for many years to come.'

Christopher Whitbread Deputy Head Teacher
Bitterne Park School

Typical Savings - (Nottingham School Case Study)

- A school was experiencing significant damage in the school communal areas.
- On going repairs were more than £4,800 per annum.
- The cost of protecting the whole school with Gradus Wall Protection was £9,200.
- **Over 10 years the saving amounts to £38,800.**
