ECO FRIENDLY
LOK-LIFT[®]
DRY ADHESIVE

dry adhesive mesh for peelable carpet fixing

- Fully releasable environmental friendly installation system for commercial use
- Totally recyclable
- Quick, easy and clean installation and removal
- No odours or VOC problems, which are commonly associated with wet adhesives
- Ideal for both broadloom and carpet tile installations
- Installs and performs over virtually any surface, including carpet, concrete and vinyl
- Permits instant re-use of the floor
- Pressure sensitive bond becomes stronger in use
- Highly resistant to rolling loads
- Dry bond adhesive mesh creates total edge to edge adhesion between carpet and sub surface

Lok-Lift permits carpet to be laid on many existing floor finishes saving costs and time, whilst avoiding mess and disruption

Unroll the Lok-Lift in the same direction as the carpet is to be installed, with the yellow plastic liner on top

Unroll the carpet onto the Lok-Lift, ensuring that the Lok-Lift seams and the carpet seams do not coincide. Fold back the carpet, remove the plastic liner to reveal the adhesive mesh and lay the carpet back into place

Carpet joints must be carefully butted or double cut and seamed
