18. A Fusion of Products

Gerflor and Gradus offer products which are ideal for use in a wide variety of applications including hospitality & leisure, residential developments, retail and commercial office.

XT™ Stair Edgings

XT is the ultimate stair edging solution, combining maximum safety, performance and aesthetics to reduce the risk of slips, trips and falls on stairs. **There is no equal.**

The introduction of our new XT Bronze profiles, new metal inserts, in addition to an enhanced range of finishes available across existing XT Aluminium profiles, offers an ideal solution for luxury hospitality & high-end residential applications.

Product specification data, product literature and BIM objects for our full XT range are available on NBS Source.

Developed in line with the latest guidance...

Supported by recommendations from BRE and the guidance contained within BS 8300-2:2018 and Approved Document M (ADM) of the Building Regulations 2010, building owners and specifiers can choose Gradus XT safe in the knowledge that it offers the ultimate solution in product design and performance to protect all groups of building users.

The Gradus XT range features a unique insert design that extends around the entire leading edge of the stair edging to ensure that foot contact is always made with the slip-resistant element of the stair edging. This is in line with the recommendations published within BRE (IP 15/03) information paper, which provides guidance to designers and building managers selecting stair edgings for non-domestic stairs.

Ideal for use with Gradus Grip (GG290) ultra strong stair edging adhesive, see page 16

Extended insert design around the entire leading edge of the stair edging

Guidance within BS 8300-2:2018 also states that 'The whole tread or the nosing should incorporate slip-resistant material, starting as close as practicable to the front edge of the nosing and extending the full width of the tread' (see diagram opposite).

Slip-resistance is further enhanced by a comprehensive choice of inserts and colours across our XT range, with options available to suit both dry and wet interior conditions. All our inserts are fully tested and achieve a **Pendulum Test Value of greater than 36**, which satisfies the requirements of BS 8300-2:2018.

The wide choice of insert colours & finishes **enable designers to achieve suitable colour contrast** with the surrounding floorcoverings in line with the guidance in ADM and BS 8300-2:2018. All Gradus products have been measured for Light Reflectance Values to ensure that sufficient contrast is achieved.

XT™ Bronze

NEW RANGE

XT Bronze stair edgings offer premium finishes for commercial applications including hospitality, leisure, retail, commercial office and premium residential.

Suitable for interior heavy traffic applications.

Used in conjunction with floorcoverings from all major manufacturers.

Information

- > For Light Reflectance Values (LRVs) and NCS references see page 17
- > XT profiles - UK patent GB2433437B. UK/EU Registered Design no 9/000465950 and 9/002471599.

2 Channel finishes

NEW

Bronze channel finishes

Our Polished Bronze finish creates a sleek appearance, whilst Satin Bronze offers a matt finish that features a subtle brushed effect.

Polished Bronze

Satin Bronze

3 Insert options

Interior

Conditions: Interior Dry
Material: Pvc with mineral inclusion

Areas where there is no risk that the stairs will be contaminated by moisture.

Xtra-grip

Conditions: Interior Dry / Interior Wet
Material: Pvc with mineral aggregate

Increased surface roughness where the stair edging may become wet e.g. stairs close to entrances.

NEW

Metal Castellated

Conditions: Interior Dry / Interior Wet
Material: Bronze or aluminium

Provides an all-metal solution that features a castellated design.

Gradus Grip GG290 - Stair Edging Adhesive

A secure bond between the stair edging and the step is essential to ensuring a safe installation.

Gradus Grip is a solvent free rapid curing flexible adhesive with excellent gap filling properties that is suitable for bonding stair edgings to most solid surfaces.

Why choose Gradus Grip:

- > **Saves time & money** - quick and easy installation
- > **10 year warranty** - on both the Gradus stair edging and Gradus Grip
- > **No more screw head cover plugs** - improved aesthetic and easier to maintain
- > **Ultra strong bond** - complete peace of mind

The stair edging, insert format, type and condition of the substrate and the application will affect the installation method required. Installation instructions are available to download at www.gradus.com.

FREE Measuring Service

Eliminate risk by arranging for a **FREE*** and accurate stair edging measure with Gradus

- > Save time
- > Save money
- > Reduces Waste
- > Avoids Errors

For further details or to **book a measure**, call Gradus Technical Support on 01625 428922.

*UK mainland only.

Fabrication Service

Curved Stair Edgings

- > Fastest, most reliable fabrication service in the UK
- > Ready for despatch within 5 working days*

Welded Corners

- > 83° and 90° welded corners are available in matching finishes

*Terms & Conditions apply - see www.gradus.com
