PROJECT:
ST HELENS HOSPITAL

Folostair FSL125A 55mm x 55mm Stair Edgings

Esplanade Plus Primary Barrier Matting

Gradus barrier matting and stair edgings

Products & Colours Specified:

- Esplanade Plus Primary Barrier Matting
Wiper Colour: Swift
- Folostair FSL125A Stair Edgings
Insert Colour: Black 51
- ADM Aluminium Stair Edgings
Insert Colour: Jet

Application:

Esplanade Plus with Swift (black) wipers was fitted at the main entrance in a bespoke shape leading from revolving doors, in addition to two other access points where the matting was fitted in an 'L' shape, providing a designated walkway for visitors and staff.

In addition, two different profiles from the aluminium range of stair edgings were fitted throughout the hospital. Folostair FSL stair edgings, specifically designed for use with ceramic tiles, were fitted on the main atrium staircase whilst ADM stair edgings were fitted on the 6 back staircases to ensure the safety of all users circulating between floors.

Specified with black inserts to contrast with the light grey flooring and highlight the step edge, both profiles measure 55mm on the tread and riser to meet Approved Document M guidelines.
