**Finish:** Satin or Polished

**Fixing:** Mechanical (screw) fix – as per manufacturer's instructions

#### Description

The Gradus Stainless Steel Floor Rail System is an ideal alternative to wall guards i.e. in situations where wall fixing is not possible, for example, across glazed walling.

The floor rail system protects against damage caused by wheeled traffic by keeping traffic away from the wall, thus protecting the substrate and reducing maintenance and repair costs. The hygienic nature of the floor rail system makes it ideal for use in environments such as kitchens and food preparation areas, hospitals and pharmaceutical laboratories.
