Freeway (Old Stone)

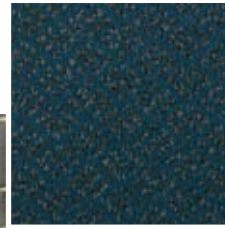

GRADUS

contract interior solutions

Freeway (Sea Breeze)

Freeway has been installed throughout the circulation areas in colour - Sea Breeze helping to create a contemporary environment for student life

The excellent performance and wear and tear resistance makes Freeway a suitable product for corridor areas with frequent pedestrian traffic

Gradus supply top class carpet for Brunel university

Completed in time for the start of the 2008 academic year, the Isambard residential complex provides quality accommodation and facilities for new and existing students. Set in landscaped grounds, the complex is divided into 17 blocks, providing 1,188 en suite rooms, 40 specially adapted rooms for students with disabilities and 112 studio flats for couples. The complex also features a coffee shop, dance studio and communal areas for students.

Gradus has supplied carpet from its Freeway range for this impressive student residential complex at Brunel University.

Freeway was installed throughout the complex, with colourway - Sea Breeze (blue) in the corridors and lift areas and colourway - Old Stone (dark beige) in the bedrooms.

Offering excellent wear and tear resistance, making it suitable for busy corridors with frequent pedestrian traffic, Freeway's dense pile also provides excellent under foot comfort. Plus, the polypropylene face yarn is stain resistant and easy to clean, reducing the university's cleaning and maintenance costs.

Available in 16 different colourways, the Freeway range can be supplied as broadloom or with a specially engineered, impervious Aquabac backing system, providing protection for the sub-floor from liquid spills.

Martyn King of Brunel University Student Residences, commented:

"Having recently invested £250million in redeveloping the University's Campus, it was important that all areas of university life, including accommodation met the same high standards. The new Isambard complex combines modern design, comfort and practicality, so it was important that the specified carpet reflected those values. The carpet from Gradus is durable enough to cope with everyday use and wear and tear, without compromising on aesthetics and comfort. We were impressed by the speed of installation and the colour options available, enabled us to specify a vibrant blue for the circulation areas and a more subtle, neutral beige for the student bedrooms."

Alongside floorcoverings, Gradus supplies a comprehensive range of stair edgings, wall protection, fabrics and barrier matting for education environments.
