PROJECT:
QUEEN MARY UNIVERSITY
OF LONDON

Esplanade Plus Primary Barrier Matting

Gradus Matting Systems

Product Installed: Esplanade Plus
Primary Barrier Matting

Colour Specified: Jackdaw

Application:

Gradus Esplanade Plus barrier matting was supplied to the Queen Mary University of London and installed into their busy Blizard Institute building at the White Chapel campus.

Suitable for use in interior and exterior locations and areas subject to heavy foot and wheeled traffic, the two large mats were installed at the main entrances of the building and extended to the outside of the lecture theatres to provide a safe and attractive entrance for students and visitors.

Esplanade Plus helps to reduce the amount of moisture and soil tracked into the building and therefore reduces the risk of slip accidents caused by wet or soiled floors.

Boulevard 5000HD in Jackdaw was chosen as the wiper. The high performance barrier carpet incorporates a light scraper for dirt removal and uses a heathered design to disguise soiling. Gradus Matting Systems are easy to maintain and can help to reduce maintenance costs throughout the building.
