PROJECT:
JOHN MOORES UNIVERSITY
LIVERPOOL

Gradus primary barrier matting

Product Specified: Esplanade Plus
Primary Brrier Matting

Colour Specified: Swift

Application:

Gradus Esplanade Plus primary barrier matting was supplied to the Learning Resource Centre at Liverpool John Moores University. Suitable for use in interior or exterior locations, subject to heavy foot and wheeled traffic, Gradus' Esplanade Plus primary barrier matting was installed in the main building entrance, providing a safe and attractive entrance for students.

Esplanade Plus helps to reduce the amount of moisture and soil tracked in, and also helps to improve safety by reducing the risk of slip accidents caused by wet or soiled floors.

The Directors at the University required a matt that was durable enough to cope with heavy everyday use, perform an important safety function and also help maintain the appearance of the surrounding floor coverings.
