Nuffield Hospital,
Cheltenham

Gradus flooring receives welcoming reception at nuffield health hospital

Opened in 2000, the Nuffield Health Hospital in Cheltenham has 3 major theatres and 33 en-suite bedrooms, providing the latest in treatment facilities and diagnostic technology. Nuffield Health, formerly Nuffield Hospital, has invested in a full refurbishment of the reception area, as part of a re-branding exercise to reflect the fresh and wider focus of Nuffield Health.

Gradus' Toli LL300 loose lay vinyl flooring was installed in tile format in a woodgrain finish. Installed in the reception area's main walkways, due to its hardwearing and durable properties, Gradus' LL300 vinyl flooring is ideal for withstanding the pressures of foot and wheeled traffic going in and out of the main hospital areas.

Vinyl flooring's surface retention properties help the reception area maintain its attractive appearance. Plus, it's exceptionally easy to clean, helping the Hospital to reduce maintenance costs. In addition, the LL300 range has an exceptionally high-recycled content of 65%, making it the ideal choice for specifiers concerned with sustainability.

Gradus' Cityscene carpet tiles in a neutral colourway - Raffia, were installed in the seating areas of the reception, providing visitors and patients with the comfort and warmth of carpet.

Both types of flooring are quick and easy to lay; the LL300 range requires little or no floor preparation and tiles are simply fitted to the sub-floor. Cityscene's attractive textured loop pile design can be installed quarter turn; broadloom or brick bond, providing a high level of style and versatility. This helps to save time on refurbishments, where limiting disruption to the end-user is a priority.
