

Cleaning & Maintenance Guidelines

Bronze Stair Edgings

Data Sheet: Page 1 of 3 AH/LO 12.02.24

These guidelines apply to the following ranges:

XT Bronze, Traditional Bronze & Elite Bronze. The relevant cleaning method should be selected in line with the stair edging finish and insert type.

This document has been compiled to help the user obtain optimum performance and satisfaction from their selected product. A regular scheduled maintenance programme should be employed to prevent the build-up of dirt and grease, which will reduce the slip-resistance properties of the profile and detract from the overall appearance of the product.

Daily Cleaning

Brush down the channel using a soft bristled brush and remove dust particles from the insert by wiping with a damp cloth.

Channel Finishes

To prevent the ageing process associated with all bronze products, the bronze channel should be cleaned regularly with a proprietary metal polish and then buffed with a lint free cloth. However, during the cleaning process, avoid contact between the polish and pvc inserts, which may result in colour loss. Care should also be taken to avoid contact with the surrounding floorcovering.

Inserts

1. **Metal Castellated Bronze inserts** – clean twice-weekly or as required:

NB. Under no circumstances should any cleaners containing hydrocarbons, bleach, pine oil or citrus based agents be used to clean any Gradus Stair Edging inserts. Steam cleaners, power washers, floor sealants, polishes or any coatings should not under any circumstances be used on inserts.

Brush down the channel using a soft bristled brush. With clean, warm water, containing the correct dilution of neutral cleaning solution apply a small amount to a well rung out damp mop or a Vileda Padmaster/3M Doodlebug and gently clean the surface of the insert in a left to right motion. During the clean, the water must be changed on a regular basis. **Do not** soak the insert. Once the stair edging has been cleaned thoroughly rinse with fresh, clean water, making sure as much water is removed as possible.

On completion the staircase should not be used until completely dry.

2. **Interior Standard and Interior Grained inserts** – clean twice-weekly or as required:

NB. Under no circumstances should any cleaners containing hydrocarbons, bleach, pine oil or citrus based agents be used to clean any Gradus Stair Edging inserts. Steam cleaners, power washers, floor sealants, polishes or any coatings should not under any circumstances be used on inserts.

Brush down the channel using a soft bristled brush. 3. Xtra-grip and Xtra-grip Plus inserts – clean twice-weekly or as required:

NB. Under no circumstances should any cleaners containing hydrocarbons, bleach, pine oil or citrus based agents be used to clean any Gradus Stair Edging inserts. Steam cleaners, power washers, floor sealants, polishes or any coatings should not under any circumstances be used on inserts.

Brush down the channel using a soft bristled brush. With clean, warm water, containing the correct dilution of neutral cleaning solution apply a small amount to a well rung out damp mop or a Vileda Padmaster/3M Doodlebug and gently clean the surface of the insert in a left to right motion. During the clean, the water must be changed on a regular basis. **Do not** soak the insert. Once the stair edging has been cleaned thoroughly rinse with fresh, clean water, making sure as much water is removed as possible.

On completion ensure that the surrounding floorcovering is completely dry before use.

4. Standard Exterior inserts – clean-twice weekly or as required:

- **Exterior applications** - To remove everyday dirt pressure wash the inserts using a 200 – 250 bar pressure washer with a neutral cleaner. Stubborn marks can be removed by scrubbing the inserts with a stiff bristled brush and a neutral cleaner.
- **Interior Applications** – Brush down the channel using a soft bristled brush. With clean, warm, water containing the correct dilution of a neutral cleaning solution, apply a small amount to a well rung out damp mop or a Vileda Padmaster/3M Doodlebug and gently clean the surface of the insert in a left to right motion. During the clean, the water must be changed on a regular basis. **Do not** soak the insert. Once the stair edging has been cleaned thoroughly rinse with fresh, clean water, making sure as much water is removed as possible. Stubborn marks can be removed by scrubbing the inserts with a stiff bristled brush and a neutral cleaner.

On completion ensure that the surrounding floorcovering is completely dry before use.
