Accessories

Project: Mid Kent College

“ A significant proportion of footfall at Mid Kent College passes through the main entrance so it is important that the stairs leading up to this are as safe as possible. We chose TEX stair edgings from Gradus as they offer slip resistance in wet or dry conditions, an important consideration for external areas. ”

Kevin Drynan
Director at HD Flooring

Mid Kent College is one of the largest further education and training providers in the South East, offering an extensive range of courses from beginners to advanced learners.

Thousands of people pass through the campus each year and, as such, the college needs to ensure a safe and inclusive environment for students, staff and visitors.

TEX stair edgings from Gradus have been installed on the exterior steps leading up to the main entrance and in the car park. The heavy duty aluminum stair edgings were selected with Firestorm (bright yellow) insert, providing both slip-resistance and visual contrast.

Profiles are ideally suited to exterior use and heavily trafficked internal stairways close to entrances and access points. They perform well in accelerated UV weathering tests and are chemical resistance tested to ISO175, making them the ideal choice for specification in areas such as motorway footbridges, railway stations, airports, sports stadia, outdoor arenas and heavy industry.

Product Specified:

- Product Range: [TEX Trans-edge Stair Edgings](#)
- Insert Colour: Firestorm
