Project: The National Cycling Centre, Manchester

“ The external stairs at the National Cycling Centre will see heavy traffic on a daily basis. Gradus TEX Stair Edgings provide slip resistance and visibility for all users, helping to ensure a safer and more accessible access. ”

Anthony Roberts
Product Manager

The National Cycling Centre, located in Sports City, Manchester, has been opened since 1994 and has become one of the World's finest and fastest board tracks. It is in use seven days a week, with a range of activities taking place for all levels of abilities. This includes regular users such as the very successful GB track cycling team, Sir Chris Hoy and Laura Trott, as well as local schoolchildren and track enthusiasts.

Gradus TEX stair edgings from Gradus have been installed on the exterior stairs leading up to the main entrance. The heavy duty aluminium stair edgings were selected with Charcoal insert, providing both slip-resistance and visual contrast.

They are suitable for not only external but internal applications such as sports stadia, motorway footbridges, railway stations, airports, outdoor arenas and for heavy industry.

Product Specified:

- [Trans-Edge® TEXN51 Aluminium Stair Edging with Heavy Duty Exterior Insert - Charcoal](#)
