Healthcare

“ Esplanade Plus high performance primary barrier matting is designed for use in environments subject to high levels of foot and wheeled traffic, making it ideal for hospitals, universities and shopping centres. ”

Lynette Bowdon
Marketing Manager

Gradus Esplanade Plus primary barrier matting was fitted with boulevard 6000 wipers in Nightfall (black/grey). Esplanade Plus is ideal for areas of application that are subject to heavy pedestrian or wheeled traffic. Boulevard 5000HD in Moorhen (grey) was also fitted as a walk off, providing the ultimate solution for moisture and dirt removal, helping to improve public safety by reducing the risk of slip accidents caused by wet or soiled floors.

Entrances are prone to heavy soiling and moisture ingress, this should be removed at all access points to a building in order to increase life expectancy and reduce maintenance costs of the adjacent floorcoverings.

The Gradus systematic approach to matting provides an attractive, functional solution, which ensures the effective removal of tracked in dirt and moisture.
