

GRADUS

Case Study

Accessories

Project: St Johns Shopping Centre

“ A well-specified barrier matting system will not only increase public safety and prolong the lifecycle of surrounding floorcoverings, but will also enhance the appearance of the entrance by creating a clean and welcoming first impression. ”

Karen Burman
Product Manager

Gradus Esplanade Plus primary barrier matting has been supplied to the entrance of the St Johns Shopping Centre in Liverpool.

Suitable for use in areas subject to heavy foot and wheeled traffic, Esplanade Plus provides a safe and attractive environment for shoppers.

Esplanade Plus primary barrier matting removes heavy soiling at the point of entry and has excellent moisture retention properties. This can help to maintain the lifecycle of surrounding floorcoverings and reduce the the risk of slip accidents.

Gradus matting systems are easy to maintain and can help reduce maintenance costs throughout the building.
