

Wall Protection

Project: UCLH NHS Foundation Trust, London

“All products will help to reduce on going repair and maintenance costs and improve the long-term appearance of the interior environment while protecting the surfaces from heavy to severe impact and abrasion caused by beds, trolleys and medical equipment.”

Maria Morgan
Product Manager

A complete wall protection system from Gradus has been installed at the Lysholm Department of Neuroradiology at the National Hospital for Neurology and Neurosurgery (NHNN).

Supplied and fitted by the Gradus Contracts Team, the system includes wall guards, corner guards and bollards from the stainless steel range, plus handrails from the 450 timber range, which is designed to meet guidelines in Approved Document M, BS8300-2:2018 and HBN 00-04.

All products will help to reduce on going repair and maintenance costs and improve the long-term appearance of the interior environment while protecting the surfaces from heavy to severe impact and abrasion caused by beds, trolleys and medical equipment.

Product Specified:

- Stainless Steel Wall Guards
- Stainless Steel Corner Guards
- 450 Timber Handrail - Colour: Oak 402
