This leaflet has been compiled to help the user obtain optimum performance and satisfaction from their selected product:

Preventative Maintenance Programme

A regular scheduled maintenance programme prevents build up of dirt and grease and therefore detracts from the overall appearance of the product.

Aluminium Profiles

Stubborn marks such as boot blacking may be removed from the aluminium profile by means of a green scotch pad and soap-less detergent. Light surface scratches can be removed with careful use of fine wire wool and buffed with a soft cloth.

NB. Under no circumstances should floor cleaners or sanitizers containing citrus based agents or hydrocarbons be used to clean any Gradus profile.
