

Cleaning & Maintenance Guidelines

BasicZ Aluminium Stair Edgings

Data Sheet: Page 1 of 1 AH/NF 08.04.22

These guidelines apply to the following Gradus BasicZ stair edging profiles only:

BSXR1, BSXR13, BSXR2, BSXR23, BSXR3, BSXS1, BSXS2, BSXS3, BSXH1, BSXH2, BSXH3.

These instructions have been compiled to help the user obtain optimum performance and satisfaction from their selected product. A regular scheduled maintenance programme should be employed to prevent the build-up of dirt and grease, which will reduce the slip-resistance properties of the profile and detract from the overall appearance of the product.

Daily Cleaning

Brush down the channel using a soft bristled brush and remove dust particles from the insert by wiping with a damp cloth.

Aluminium Channel

Stubborn marks such as boot blacking may be removed from the aluminium channel by means of a grease scotch pad and an aluminium safe detergent. Light scratches can be removed with careful use of fine wire wool and buffed with a soft cloth.

Inserts – Interior Standard Finish

Twice Weekly or as required:

NB. Under no circumstances should any cleaners containing hydrocarbons, bleach, pine oil or citrus based agents be used to clean any Gradus Stair Edging with Interior Standard Finish inserts.

Steam cleaners, power washers, floor sealants, polishes or any coatings should not under any circumstances be used on inserts.

Brush down the channel using a soft bristled brush with clean, warm water containing the correct dilution of aluminium safe cleaning solution, apply a small amount to a wet rung out damp mop or Vileda Padmaster/3M Doodlebug and gently clean the surface of the insert in a left to right motion. During the clean, the water must be changed on a regular basis. Do not soak the insert. Once the stair edging has been cleaned, thoroughly rinse with fresh, clean water making sure as much water is removed as possible.

Important - On completion the staircase should not be used until completely dry.

Recommended Cleaning Products for Gradus BasicZ Aluminium Stair Edgings

Gradus has worked with Selden Research to undertake extensive testing on all Gradus stair edgings. As a result, a range of cleaning products has been recommended for use with Gradus stair edgings in a variety of environments.

The cleaning products listed below are suitable for these particular stair edgings.

For further information about these cleaning products, including environment sustainability, instructions for use and COSHH data sheets, please contact:

Selden Research Limited, Staden Business Park, Staden Lane, Buxton, Derbyshire, SK17 9RZ.
