

Lighting

Project: Haymarket Theatre

“The lighting system supplied by Gradus is perfect for the new look of the theatre. Not only does it create a safe environment, but it also adds to the theatre’s ambiance and customers’ enjoyment.”

Natalie Cheery
PR and Marketing Director at Haymarket Consortium

After being closed for over a decade, the Haymarket Theatre in Leicester is enjoying a new lease of life after a £3.6 million investment in the building.

As part of the project, Gradus was chosen to supply and fit continuity LED step lighting to provide a contemporary linear effect and complement the new modern interior of the theatre. Not only does step lighting add to the design, but it also allows customers and staff to move around safely in darkened lighting conditions.

RNT718L illuminated stair edgings with blue Continuity were selected to clearly identify the edge of all steps in the theatre, helping customers and staff to identify changes in level and reduce the risk of slips and trips on the stairs in low light conditions.

Paul Hodgkinson, Senior Project Manager at Gradus, added: “It was great to be part of a project to resurrect a theatre that had been closed for over a decade. Seeing new life being breathed into it and knowing that our stair edgings were helping to provide a safe yet aesthetically pleasing solution was really exciting.”

Product Specified:

- RNT718L illuminated stair edging with blue Continuity
