

Wall Protection PVC-u Profiles and Sheet

Data Sheet: Page 1 of 1
CD/LB February 2017

This leaflet has been compiled to help the user obtain optimum performance and satisfaction from their selected product:

Maintenance Programme

A regular scheduled maintenance programme should be employed to prevent the build-up of dirt and grease, which will detract from the overall appearance of the product and can lead to the spread of germs and bacteria.

Apply cleaner to a micro fibre cloth and wipe the surface of the profile. When cleaning handrails, particular attention should be paid to the underside of the handrail as this is where dirt and grease can build up.

The cleaned surface should then be 'rinse wiped' using clean water and then thoroughly dried using a soft cloth. This ensures all cleaning residue is removed.

Abrasive cleaners, solvents or cleaning pads should NOT be used as they will damage the profile surface.

Recommended Cleaning Products for Gradus PVC-u Wall Protection Profiles and Sheet

Gradus has worked with Selden Research to undertake extensive testing on Gradus PVC-u wall protection profiles and, as a result, a range of cleaning products has been recommended for use with Gradus profiles in a variety of environments.

The cleaning products listed below are suitable for all Gradus PVC-u profiles including handrails, combination rails, Dual Rail, wall guards, wall strips, bed head protectors and corner guards as well as Gradus PVC-u sheet including SureProtect Endure® and SureProtect Design®.

For further information about these cleaning products, including environment suitability, instructions for use and MSDS data sheets, please contact:

Selden Research Limited, Staden Business Park, Staden Lane, Buxton, Derbyshire, SK17 9RZ.
