Fixing: Tape or adhesive

Description

The Gradus Adjustable Angle PVC-u corner guard provides a medium duty corner protection solution to irregular corner angles. It features flexible wing tips that provide a close fit to the wall face and is available with tape for quick and easy installation or without tape for installing with a suitable adhesive. Adjustable Angle PVC-u corner guard is non-reflective and through-coloured & textured to conceal the effects of impact and abrasion.

Corner guards can be selected in a contrasting colour to the wall finish for corner identification in areas used by visually impaired people in line with BS8300:2009+A1:2010 and The Building Regulations 2010 - Approved Document M guidelines. Light Reflectance Values (LRVs) are detailed above for all colours to allow the correct visual contrast to be achieved.
