Depth: 109mm

Length: 4.00m

Colour (select as required – handrail and wall guard colours should be selected separately):

For colour options please see above

Fixing: Mechanical (screw) fix – as per manufacturer's instructions

Description

The Gradus D200 Dual Rail is a cost effective solution for where both a handrail and wall guard are required as a combined system. Ideal for healthcare environments where pedestrian support is required in addition to protection against severe impact, Dual Rail has been developed to meet the guidelines in Health Building Note (HBN) 00-04, BS8300:2009+A1:2010 and Approved Document M 2004 & Approved Document K 2013 of The Building Regulations 2010 with the aim to help specifiers and building owners meet their duties under the Equality Act 2010.

The D200P option of Dual Rail features a PVC-u handrail and a PVC-u wall guard. All PVC-u covers and accessories are non-reflective, through coloured and textured to conceal the effects of impacts and abrasion. The wide choice of colours offers the flexibility to contrast the wall guard from the handrail and the handrail from the wall. The handrail element should be selected in a contrasting colour to the wall finish to aid movement around a building for visually impaired people in line with BS8300:2001+A1:2010 and The Building Regulations 2010 - Approved Document M guidelines. Light Reflectance Values (LRVs) are detailed above for all colours.
