

Lunch and Learn

As a manufacturer of multiple interior solutions, the Gradus Lunch & Learn is an informal workshop where we bring a cross-section of project relevant product samples, literature and expertise directly to you. The idea is that we come along at a pre-agreed date and time and set up a presentation of relevant product samples and catalogues in your office. Members of the practice can drop in on an ad-hoc basis and stay for as long as required. The Lunch & Learn typically lasts around 1-2 hours (with the option to add a CPD if desired) and during this time people drop in as they wish and we'll be available to discuss our products and assist with any specific requirements you may have.

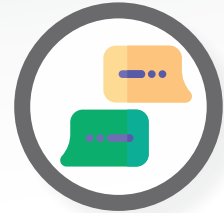

Product samples,
literature and
expertise

Lunch/snacks

1-2 hours

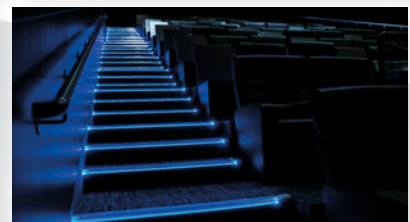

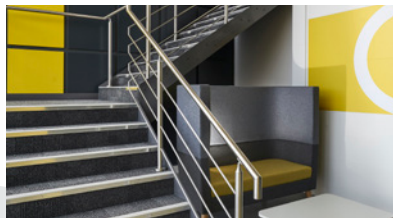

Discuss our
products

Product Expertise

We can offer product expertise in:

- Stair Edgings
- Floor Trims
- Barrier (Entrance) Matting Systems
- Carpets
- Wall Protection
- LED Lighting
- Safety and Protection Systems

Alternatively, if you would like a CPD, we have 3 to choose from
please turn over for more information.

CPD

Each seminar we offer is worth 2 RIBA hours as part of the core curriculum and lasts approximately 30 minutes, with time for questions afterwards. These are also typically delivered during lunch and we are happy to work with you to provide lunch, or snacks should you choose an alternative to lunch time.

1. The Specification & Design Considerations of Stair Edgings

This seminar provides an overview of the issues to consider for the design and specification of stair edgings, including relevant legislation and the latest guidance and research. It will help you to understand the following topics:

- Understand stair safety in general
- Understand how to create safe stairs
- Understand how stair edging can be incorporated into your designs
- Understand visual contrast & slip resistance when specifying stair edging

Material type: Seminar

RIBA Core Curriculum:

- Design, construction and technology
- Health, safety and wellbeing
- Legal, regulatory and statutory compliance

Knowledge level: General Awareness

2. The Specification & Design Considerations of Barrier Matting Systems

Architects will gain information that will help them to specify entrance matting systems effectively, where and how to use it, ideas on how to use it, types of product available etc.

Material type: Seminar

RIBA Core Curriculum:

- Design, construction and technology
- Health, safety and wellbeing
- Legal, regulatory and statutory compliance

Knowledge level: General Awareness

3. The Specification & Design Considerations of Wall, Corner & Door Protection Systems

This seminar will give the specifier all he or she needs to know to make the most effective decisions when specifying interior protection.

Material type: Seminar

RIBA Core Curriculum:

- Design, construction and technology
- Health, safety and wellbeing
- Legal, regulatory and statutory compliance

Knowledge level: General Awareness
